ANNEXUE: 2

Instructions To Bidder for Online Bid Submission

The bidders are required to submit soft copies of their bids electronically on the CPP Portal, using valid Digital Signature Certificates. The instructions given below are meant to assist the bidders in registering on the CPP Portal, prepare their bids in accordance with the requirements and submitting their bids online on the CPP Portal.

More information useful for submitting online bids on the CPP Portal may be obtained at: https://eprocure.gov.in/eprocure/app.

REGISTRATION

1) Bidders are required to enroll on the e-Procurement module of the Central Public Procurement Portal (URL: https://eprocure.gov.in/eprocure/app) by clicking on the link "Online bidder Enrollment" on the CPP Portal which is free of charge.
2) As part of the enrolment process, the bidders will be required to choose a unique username and assign a password for their accounts.
3) Bidders are advised to register their valid email address and mobile numbers as part of the registration process. These would be used for any communication from the CPP Portal.
4) Upon enrolment, the bidders will be required to register their valid Digital Signature Certificate (Class III Certificates with signing key usage) issued by any Certifying Authority recognized by CCA India (e.g. Sify / nCode / eMudhra etc.), with their profile.
5) Only one valid DSC should be registered by a bidder. Please note that the bidders are responsible to ensure that they do not lend their DSC's to others which may lead to misuse.
6) Bidder then logs in to the site through the secured log-in by entering their user ID / password and the password of the DSC / e-Token.

SEARCHING FOR TENDER DOCUMENTS

1) There are various search options built in the CPP Portal, to facilitate bidders to search active tenders by several parameters. These parameters could include Tender ID, Organization Name, Location, Date, Value, etc. There is also an option of advanced search for tenders, wherein the bidders may combine a number of search parameters such as Organization Name, Form of Contract, Location, Date, Other keywords etc. to search for a tender published on the CPP Portal.
2) Once the bidders have selected the tenders they are interested in, they may download the required documents / tender schedules. These tenders can be moved to the respective 'My Tenders' folder. This would enable the CPP Portal to intimate the bidders through SMS / email in case there is any corrigendum issued to the tender document.
3) The bidder should make a note of the unique Tender ID assigned to each tender, in case they want to obtain any clarification / help from the Helpdesk.

PREPARATION OF BIDS

1) Bidder should take into account any corrigendum published on the tender document before submitting their bids.
2) Please go through the tender advertisement and the tender document carefully to understand the documents required to be submitted as part of the bid. Please note the number of covers in which the bid documents have to be submitted, the number of documents - including the names and content of each of the document that need to be submitted. Any deviations from these may lead to rejection of the bid.
3) Bidder, in advance, should get ready the bid documents to be submitted as indicated in the tender document / schedule and generally, they can be in PDF / XLS / RAR / DWF/JPG formats. Bid documents may be scanned with 100 dpi with black and white option which helps in reducing size of the scanned document.
4) To avoid the time and effort required in uploading the same set of standard documents which are required to be submitted as a part of every bid, a provision of uploading such standard documents (e.g. PAN card copy, annual reports, auditor certificates etc.) has been provided to the bidders. Bidders can use "My Space" or "Other Important Documents" area available to them to upload such documents. These documents may be directly submitted from the "My Space" area while submitting a bid, and need not be uploaded again and again. This will lead to a reduction in the time required for bid submission process.
   Note: My Documents space is only a repository given to the Bidders to ease the uploading process. If Bidder has uploaded his Documents in My Documents space, this does not automatically ensure these Documents being part of Technical Bid.

SUBMISSION OF BIDS

1) Bidder should log into the site well in advance for bid submission so that they can upload the bid in time i.e. on or before the bid submission time. Bidder will be responsible for any delay due to other issues.
2) The bidder has to digitally sign and upload the required bid documents one by one as indicated in the tender document.

3) Bidder has to select the payment option as "offline" to pay the tender fee / EMD as applicable and enter details of the instrument.
4) Bidder should prepare the EMD as per the instructions specified in the tender document. The original should be posted/couriered/given in person to the concerned official, latest by the last date of bid submission or as specified in the tender documents. The details of the DD/any other accepted instrument, physically sent, should tally with the details available in the scanned copy and the data entered during bid submission time. Otherwise the uploaded bid will be rejected.
5) Bidders are requested to note that they should necessarily submit their technical & financial bids in PDF format only and no other format is acceptable. If the price bid has been given as a standard BoQ format with the tender document, then the same is to be downloaded and to be filled by all the bidders. Bidders are required to download the BoQ file, open it and complete the white coloured (unprotected) cells with their respective financial quotes and other details (such as name of the bidder). No other cells should be changed. Once the details have been completed, the bidder should save it and submit it online, without changing the filename. If the BoQ file is found to be modified by the bidder, the bid will be rejected.
6) The server time (which is displayed on the bidders' dashboard) will be considered as the standard time for referencing the deadlines for submission of the bids by the bidders, opening of bids etc. The bidders should follow this time during bid submission.
7) All the documents being submitted by the bidders would be encrypted using PKI encryption techniques to ensure the secrecy of the data. The data entered cannot be viewed by unauthorized persons until the time of bid opening. The confidentiality of the bids is maintained using the secured Socket Layer 128 bit encryption technology. Data storage encryption of sensitive fields is done. Any bid document that is uploaded to the server is subjected to symmetric encryption using a system generated symmetric key. Further this key is subjected to asymmetric encryption using buyers/bid opener's public keys. Overall, the uploaded tender documents become readable only after the tender opening by the authorized bid openers.
8) The uploaded tender documents become readable only after the tender opening by the authorized bid openers.
9) Upon the successful and timely submission of bids (i.e. after Clicking "Freeze Bid Submission" in the portal), the portal will give a successful bid submission message & a bid summary will be displayed with the bid no. and the date & time of submission of the bid with all other relevant details.
10) The bid summary has to be printed and kept as an acknowledgement of the submission of the bid. This acknowledgement may be used as an entry pass for any bid opening meetings.

ASSISTANCE TO BIDDERS

1) Any queries relating to the tender document and the terms and conditions contained therein should be addressed to the Tender Inviting Authority for a tender or the relevant contact person indicated in the tender.
2) Any queries relating to the process of online bid submission or queries relating to CPP Portal in general may be directed to the 24x7 CPP Portal Helpdesk.

TECHNICAL SPEICIFCATIONS

Ultrasonic Pulse Velocity Measurement System

Quantity: 1 complete set

Purpose: Non-destructive evaluation of rock, concrete and ceramic specimens, including pulse-velocity measurements and supporting assessment of elastic properties.

The bidder should provide detailed reasoning for how they comply with each specification listed below.

Minimum technical requirements

1. Application and compliance

The offered system shall be suitable for field measurements on rock, concrete and ceramic materials. The quoted supply shall comprise the measurement unit, compatible P-wave and S-wave measurement capability, required transducers and leads, couplant, reference/calibration accessory, charging equipment, data-transfer interface, protective carrying case, necessary software, user documentation, commissioning and user training. The system shall be suitable for testing in accordance with ASTM C597 and the applicable requirements of IS 13311. The bidder shall state the editions/parts supported and identify any limitations. All components required for the specified functions shall be included.

The tendered price shall include, as a minimum, the following items:

Measurement/control unit – 1 No.; compatible transducers in the base configuration – 2 Nos. (nominal 50–60 kHz band); BNC adapter lead – 1 No.; BNC cables of approximately 1.5 m – 2 Nos.; ultrasonic couplant – 1 bottle; reference/calibration rod suitable for the instrument – 1 No. (nominal transit-time reference around 25 µs or manufacturer-standard equivalent); USB charger and cable – 1 set; and a protective carrying case – 1 No. The bidder shall list any item required for the stated functions that is not included in the base package and quote it separately.

2. Measurement capability and transducers

The instrument shall permit measurements using both longitudinal (P-wave) and shear (S-wave) transducers, either supplied or identified as compatible options. The base supply shall include two transducers with a nominal frequency in the 50–60 kHz band, or an equivalent configuration, as justified by the bidder, for the intended specimens.

The transit-time measurement window shall cover at least 0.1–7,900 µs, with a displayed time increment no coarser than 0.2 µs. The excitation pulse shall operate over a range covering 100–450 Vpp or a wider range. The system shall support transducer frequencies spanning 20–500 kHz or a wider band; the bidder shall state the supported frequency range and identify the transducers supplied.

3. Displayed results, review and analysis

The system shall provide, as applicable to the selected test mode, transit time, propagation path length, calculated pulse velocity, line-scan results, crack-depth estimates and area-scan results. Stored records shall include measurement date/time and a list or index that allows earlier measurements to be reviewed.

The interface shall provide zooming and scrolling, cursor-based review of A-scan signals, selectable automatic and manual triggering, and a graphical view of pulse-velocity variation. Where supported by the instrument/software, it shall provide SONREB-based compressive-strength estimation and two-dimensional uniformity mapping with user-selectable colour classes based on pulse velocity or transit time. A measurement interval/countdown indication shall be available where supported. The bidder shall identify any function requiring additional software or licensing.

The system should permit user-defined or uploaded calibration/conversion relationships for estimating compressive strength and elastic modulus, where supported by the supplied instrument and software. The bidder shall describe the method for entering, storing and applying such relationships.

4. Data storage, power and interfaces

Internal data storage shall be at least 8 GB or provide equivalent capacity for retaining and reviewing field measurements. A USB interface shall be provided for connection to a computer and/or transfer of recorded data.

The unit shall be battery-operated and support a full field-working day; the bidder shall declare the rated operating duration under normal measurement conditions. A target operating duration of 20 hours or more is preferred. The signal amplification system shall provide adjustable gain covering at least 0–80 dB, with ten or

more selectable steps. The bidder shall state the available gain range and number of settings.

5. **Display and enviroomental suitability**

The instrument shall have an integrated color touchscreen of approximately 7 inches or larger, with a readable display resolution of at least 800 × 480 pixels.

The instrument shall be specified for operation in ambient temperatures spanning 10–50 °C. The bidder shall state any additional humidity, ingress-protection or environmental restrictions relevant to field use.

6. **Documentation, calibration and technical response**

The supplier shall provide operating and maintenance instructions, details of the supplied accessories, data-transfer/software instructions and available calibration or verification procedure. Any software licence, cable, accessory or interface essential to the quoted functions shall be identified and included in the offered configuration.

A clause-by-clause compliance statement shall be submitted. The bidder shall mark each requirement as compliant, partly compliant, non-compliant or optional, and explain any deviation, dependency or additional cost.

7. **Optional Items**

Optional Item 1: Exponential transducers (1 set)

Exponential transducers operating at 54 kHz, including the associated calibration rod.

Optional Item 2: Shear-wave couplant (2 tubes)

Shear-wave couplant, 2 oz per tube, suitable for use with compatible shear-wave transducers.

Optional Item 3: Transducers (1 set)

UPV transducers operating at 24 kHz.

Optional Item 4: Shear-wave transducers (1 set)

Shear-wave transducers operating at 250 kHz, compatible with the offered instrument; required couplant shall be quoted separately.

Optional Item 5: Transducers (1 set)

UPV transducers operating at 150 kHz.

GENERAL CONDITIONS

1. The OEM/bidder shall demonstrate at least 10 years of experience in manufacturing comparable equipment at its manufacturing facility and submit documentary evidence with the technical bid.
2. The OEM shall have a service facility or authorized service office in southern India, including Tamil Nadu, Telangana, Andhra Pradesh or Kerala. Documentary proof shall accompany the bid.
3. Details and photographs of the OEM/bidder's or sister concern's in-house testing and calibration facilities shall be submitted, where applicable.
4. The OEM shall identify its manufacturing site and provide a valid factory licence or equivalent statutory evidence of the manufacturing facility.
5. The bidder shall submit an affidavit declaring that it has not been debarred or blacklisted by a Central or State Government department/institution during the preceding 10 financial years.
6. The bidder shall provide evidence of prior supply of comparable equipment to a recognised academic, research or government organisation. Copies of relevant purchase/work orders and performance certificates shall be submitted.
7. An original manufacturer's catalogue or official technical brochure for the offered model shall be included with the bid.
8. The offered model shall be identifiable on the OEM's official website, and its online description shall be consistent with the submitted catalogue and offered configuration.

9. During technical evaluation, the purchaser may request an online demonstration to assess the offered system's compliance. The bidder shall arrange the demonstration within five calendar days of receiving the request; failure to do so may lead to rejection.
10. Payment shall be processed in accordance with the purchase order after delivery, installation/commissioning, demonstration and acceptance at IISER TVM. The supplier shall provide at least one working days of on-site training to at least three users at no extra charge. During acceptance, the supplier shall demonstrate the specified measurement modes, data review, scans/visualisation and connectivity functions that are included in the offered configuration.
11. The supplier shall provide an after-sales support escalation matrix, including service contact details and escalation levels.
12. The offered equipment shall carry a minimum two-year warranty from installation/acceptance. Any exclusions shall be stated clearly in the bid.
13. Quoted prices shall include applicable GST, packing, freight, unloading, installation and commissioning unless a cost component is explicitly identified otherwise in the financial bid.
14. Any optional items or services shall be itemised and priced separately from the mandatory base package.
